

Mobil ServSM Lubricant Analysis Video Transcript

- Speaker labels: Male voice

[Background upbeat music playing]

00:00: We all know oil analysis helps limit unscheduled downtime, equipment repair and lost productivity **[time ticking starts at 00:08]** we also know that submitting samples can be cumbersome and time-consuming, but it doesn't have to be.

00:15: **[Time ticking sound ends and chalk board wiping sound starts]** Now there is another way, Mobil Serv Lubricant Analysis featuring scan-and-go technology. **[Chalk board wiping ends 00:18]**

00:22: With scan and go there's no hunting for equipment information, no printing labels, no filling out all the data by hand. You just scan the bottle and the equipment tag, document the details, and mail the sample. **[00:31 & 00:33 scanning beep/sound]**

00:37: Done. Fewer steps, better data accuracy. Documented evidence proves that the program can make the process of submitting samples 66% faster than standard methods.

00:48: One large operation saves more than eight hours per month, an entire day

00:54: and Mobil Serv Lubricant Analysis has an intuitive interface for easier account management and equipment monitoring. You can receive updates, reports, and recommendations on your mobile device wherever you are.

[01:10: [01:10 – 01:17 machine whirring sound] Mobil serv lubricant analysis, the faster way to protect your equipment so you can spend more time building your business.

01:18: What would you do with an extra day every month?
